About me

After 10 years of experience in the world of payroll, ERP and HRIS, including two years as a QA Referent for a SaaS payroll software publisher, I became fascinated by the job of an IT developer.

In 2022, I started training to become a Web and Mobile Web Developer and obtained my professional qualification in 2023.

This transition is a natural progression based on my experience, analytical skills, passion for technology and willingness to learn.

Web developer
